Nutricare® compact balloon gastrostomy tube

Introducing a new generation of gastrostomy feeding tube - designed for patients who fall between traditional options. When a low-profile button isn't appropriate and a longer gastrostomy tube is too cumbersome, our hybrid design offers the perfect balance of comfort, practicality, and discretion.

Nutricare® compact balloon gastrostomy tube

The Nutricare compact gastrostomy tube is intended to provide feed, medication, and/or hydration directly into the stomach, through the abdominal wall. It may also be used for gastric decompression. It is intended for placement into an established gastrostomy stoma tract, as well as for initial placement into a newly established gastrostomy stoma tract with the use of gastropexy sutures.

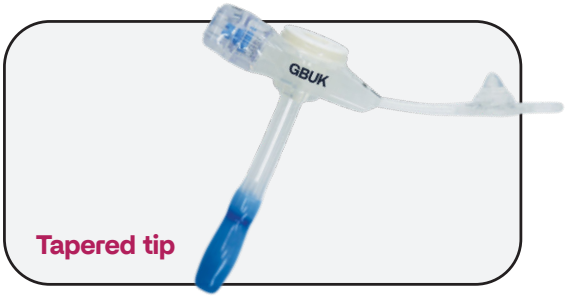

Features and benefits

- **Durable balloon,** so water loss is reduced due to gas barrier design, allowing for monthly water changes
- **Tapered tip** for ease of insertion
- **Radiopaque line** for visibility on X-ray
- **Variable fill balloon** to tailor balloon fill for better patient fit
- **Apple shaped balloon** for an effective seal at the stoma tract
- **Made of soft silicone** for patient comfort
- **Right angle external retention device** allows the tube to be folded securely against the skin creating a low profile and discreet device
- **Thoughtful external retention device design** allows for air circulation

Nutricare® low profile balloon gastrostomy button kit

The Nutricare Button is intended to provide feed, medication, and/or hydration directly into the stomach, through the abdominal wall. It may also be used for gastric decompression. It is intended for placement into an established gastrostomy stoma tract, as well as for initial placement into a newly established Gastrostomy stoma tract with the use of gastropexy sutures.

Tapered tip

Apple shaped balloon

Features and benefits

- **Extra small footprint** to allow for air circulation and comfort
- **Apple shaped balloon** for an effective seal at the stoma tract
- **Durable balloon,** so water loss is reduced due to gas barrier design, allowing for monthly water changes
- **Size specific introducer** to aid insertion if required
  The tip of the introducer corresponds with the button shaft length, and will not protrude past the tube tip
- **Tapered tip** for ease of insertion
- **Variable fill balloon** to tailor balloon fill for better patient fit
- **Soft silicone** for patient comfort
- **Radiopaque line** for visibility on X-ray
- **Convenient** kit includes three feed sets, a size specific introducer, gauze and balloon inflation syringe
- **Clearly marked** balloon inflation port clearly marked with recommended fill volume, for convenience

Nutricare® feed sets for Nutricare low profile balloon gastrostomy button

The Nutricare feed set is an enteral feed set which attaches to the feeding/medicine port of the Nutricare low profile balloon gastrostomy button (Nutricare button). The Nutricare feed set is a non-sterile, single patient use device, made from silicone. All feed sets are fitted with an ISO 80369-3 compliant ENFit® connector.

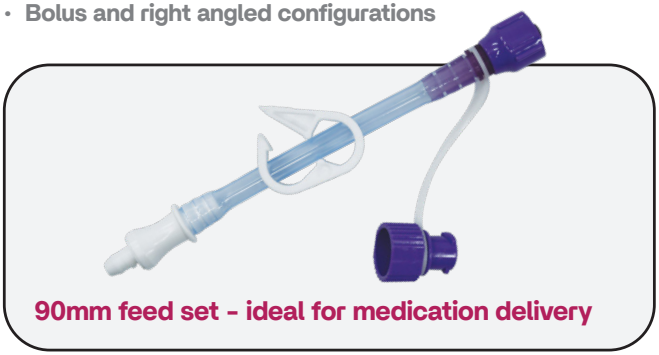

Twice the usable life, compared with market leading alternatives*

280mm straight and right angle feed set

Features and benefits

- **Silicone tubing,** not PVC, like many other brands of feed set
- **100% increase in use lifetime** compared to other feed sets on the market
- **Aids sustainability** targets and reduces plastic waste
- **Bolus and right angled configurations**

90mm feed set - ideal for medication delivery

Size	Description	UOI	Code	NHSSC
280mm	Right angle feed set with ENFit connector and cap	5	GBF280R	FAE85180
280mm	Straight feed set with ENFit connector and cap	5	GBF280S	FAE85178
600mm	Right angle feed set with ENFit connector and cap	5	GBF600R	FAE85179
600mm	Straight feed set with ENFit connector and cap	5	GBF600S	FAE85181
90mm	Straight feed set with ENFit connector and cap	5	GBF90MS	FAE85182

*Based on internal testing. Actual duration may vary depending on clinical use conditions.

Nutricare® stoma measuring device

The Nutricare stoma measuring device is a sterile measuring probe made of high-quality medical silicone in size 12Fr. The Nutricare stoma measuring device determines the length of an already existing and healed stoma tract with an accuracy of ±2 mm, in order to support the selection of the appropriate length of the gastrostomy button.

Features and benefits

- **12Fr size** used to measure the length of all stoma tract widths from 12Fr upwards
- **Medical grade** silicone tubing
- **Intuitive design**
- **Individually packed**
- **Free of latex**, PVC , DEHP and Bisphenol A
